## **GWA Presents a 2013 Manufacturing Expo**

Industry Experts join GWA Business Solutions Manufacturing Expo to help Canadian Manufacturers Fund, Finance, Automate and Do Things Once.

**Toronto, Canada – October 22, 2013** – GWA Business Solutions Inc. presents their Manufacturing Expo to help manufacturers succeed as reports of manufacturing returning to North America continue to make news. To help in the bid to escalate this growing trend of “onshoring” or “reshoring” at Canadian manufacturers, GWA’s expo features informative industry experts at an exclusive event on November 21<sup>st</sup> from 8 am to noon at the Hampton Inn & Suites Toronto Airport.

The expo is geared to addressing the key factors in improving effectiveness and profitability and to help with the SME initiative “Take Back Manufacturing” in Canada. It features sessions on fundamental topics such as government grants, financing, automation, eliminating redundancy, and provides many opportunities to network with peers, discuss critical issues, and get advice from industry experts. Attendees will go away with information they can put into action right away.

Since funding is a key challenge for manufacturers, and can be a barrier to innovation according to KPMG’s “Canadian Manufacturing Outlook 2013,” ([link to article](http://www.kpmg.com/ca/en/issuesandinsights/articlespublications/pages/canadian-manufacturing-outlook-2013.aspx) <http://www.kpmg.com/ca/en/issuesandinsights/articlespublications/pages/canadian-manufacturing-outlook-2013.aspx>) the GWA expo features two industry experts providing education on how to tap into grants, how they work and how companies are “really” getting these grants today. Financing experts will share the financing options available, some may surprise, and how a manufacturer can benefit from financing. Manufacturers will have the opportunity to discuss their specific issues and get advice from the funding and financing experts. With financial resources in place manufacturers will be well positioned for capital expenditures, R&D development, and training to grow their market share.

Automation, GWA's philosophy of "Doing Things Once," and the secrets of successful manufacturers are explored at the expo. Understanding manufacturing business processes and finding ways to eliminate redundancies are important to reducing overhead costs and improve business results. In some instances, new or improved technology may be required and in others simply changing the processes can yield cost effective and immediate benefits. Manufacturers can learn about the automation technology they can leverage, and in some cases get funding for, as well they'll gain time saving techniques and processes shared by the team at GWA.

The exclusive Manufacturing Expo hosted by GWA Business Solutions provides an ideal venue for all types of manufacturers to obtain valuable information on many aspects of their business in one place. GWA and their team of experts look forward to advancing the "Take Back Manufacturing" initiative and help Canadian manufacturers prosper.
